

To provide a product line architecture approach in support of mobile computing for live training systems focusing on standardization, framework, and developer guides with consideration to constraints.

- Architecture
 - Architecture Specification
 - Architecture Description
- Framework
- Governance
- Style Guide
- Developers Guide

- Bottom Line: Define a Product Line approach for Mobile Applications to hone development, support cost reduction, ensure look-and-feel across solutions, and enhance reuse.

MAF Strawman OV-1

Provides:

- Architecture and Reuse Components for the developer
- Source of capability for the Soldier
- Applications and Data for CTIA instances
